
FASTBUDGET

Case: 29835 Major FASTBudget Upgrade

The FAST Budget has had a major upgrade. To find out more please refer to the upgrade notes found in the separate document attached.

FASTFINAID

Case: 29510 Add FUND Managent warehouse table and report

Added new Fund Management report under new Fund Reports top level menu node.

Case: 29652 Financial Aid Year filter option

Modified Aid Year filters to pull appropriate aid year descriptions.

FASTFINANCE

Case: 29591 Add Document Type column to Document Number Search report

Added a Document Type [description] column to the Document Number Search report. This column is enabled by default, and displays a description (ex. "Journal Voucher" or "Invoice") of what the Document Type is. There is also a Document Type [code] column hidden by default that can be enabled if you'd rather see the code instead of the description (ex. "JV" or "INV").

Case: 29660 Values on Total Spend report are net amounts, don't include taxes or discounts or addn charges

Fixed a bug with the Total Vendor Spend report. The values in the PO and Direct columns were showing the net amounts and not including taxes, additional charges, or discounts. These columns will now display the gross amounts.

FASTHR

Case: 29650 Improve performance of Payroll Earnings Detail and Deduction Detail reports

Improved the performance of the Payroll Earnings Detail and Payroll Deduction Detail reports. If your organization had a prior customization on either of these reports it will need to be updated.

FASTPORTAL

Case: 29635 Add links to datagrid administration from gear icon

For users with Master Role access (ex. individual application administrators) or with full Site Administration access, the gear icon above each grid will now show buttons that link to the Datagrid Administration screen (and the Datagrid Entry Administration screen if applicable).

FASTSTUDENT

Case: 29472 Update course list dropdown on grading page to use instructor course assign list table

The limit of the number of instructors that can access a course for grading has been removed.

Case: 29473 Update the Assign Instructor feature to populate the instructor course assign table and keep them indefinitely

When instructors are manually added to a course they will persist until the course has been graded, or they have been added in your Student Information System.
