

---

***FASTBUDGET***

---

**Case: 21201 Add filters to Review End User Requests report**

Added Status and External Code filters to Review User Requests.

---

***FASTBUILDER***

---

**Case: 27332 Allow users to edit color codes for Custom Grouping values**

Added configuration settings 5015 - 5027 to Site Administration. This allows administrators to edit the background colour codes for Custom Grouping rows (ex. "GROUPINGTYPE" subtotal & total rows on specially constructed custom reports).

---

***FASTFINAID***

---

**Case: 27400 Create Fin Aid Comments report**

Created a new report that will list all of the comments made in reference to a student's financial aid request.

---

***FASTPORTAL***

---

**Case: 27152 User Role Assignment report, add Auto Loaded filter**

Added a new "Auto Loaded" (Yes/No) filter to the User Role Assignment page.

**Case: 27340 Pinned Report can break if cross tabbed columns are re-ordered**

Disabled the ability to drag and drop re-order cross tabbed columns.

**Case: 27391 Virtual Column updates**

Updates and tweaks to Virtual Columns, a new feature introduced in version 4.3.06. If a user adds a new Virtual Column to a report which breaks the report (ex. because of a divide by zero error, or some other issue with the data or formula) the user can now update/disable/delete the Virtual Column (by clicking the gear icon) even if the report won't execute or display the data grid.

**Case: 27428 Excel export issues for clients with F5 load balancers running IIS 8.5**

For clients with F5 load balancers who run FAST on IIS 8.5 web servers, Excel exports on certain reports might fail without this fix. This fix was back ported to version 4.3.04 as well.
