

***FASTJV***

---

**Case: 36692 Allow multiple Charts in a single document**

Until now, FAST JV had only allowed one Chart of Account to be entered for a document. After the first accounting line was added, all other accounting lines had to use the same Chart as the first line. After testing this in the wild, a client has confirmed that documents from the FAST JV system that use multiple charts can be processed correctly so we have added a new Configuration Setting #11 to disable this restriction if you choose.

\* Note that if you want to use two charts in a single document your fiscal periods will need to line up for both charts.

---

## ***Global Changes That Affect All Applications***

---

**Case: 36395 CSV export always forces columns output in default order**

Fixed a bug where CSV exports would always output the columns in the default order instead of the order set by the user via the Advanced Options.

**Case: 36399 New administration form for Database Links**

Created a new form in each application under Queries -> Query Builder -> External Database Links to display all database links that are available to an application's QUERY schema and allow technical administrative users to create or modify these database links.

**Case: 36460 Don't Display NULL Values on Line Graphs**

Fixed a bug where NULL values in the y-axis field were showing as 0s on line graphs. The line will no longer appear for NULL values.

**Case: 36500 "Data as of date" label for external modules**

The Client Warehouse Builder will now update the As At data refresh label for custom external applications.

**Case: 36703 Can't upload to Excel when export to Excel is disabled**

Fixed a bug where a data entry page with Export to Excel turned off and Import from Excel turned on would not show the Excel button on the footer ribbon.
