Case: 35068 Program added to Field of Study warehouse tables

New columns PROGRAM_CODE and CURRICULUM_PRIORITY have been added to the concurrent curriculum warehouse tables (SYNFLD_OF_STUDY_INFO).

Case: 36442 Need to be able to find students who are "eligible" to register

The Student General Info report now optionally includes students who are eligible to register (in addition to students who are registered). The additional students to be included and considered 'eligible to register' will be controlled by the following Student Configuration settings:

- 420 - Eligible to Register - Number of Stop Out Days Allowed: Default = 365
- 425 - Student Info - How many days beyond current term do you want? Default = 365
- 428 - Student Info - How many days prior to current term do you want all eligible records? Default = 0

Case: 36487 Add Program and Program Desc to the Admissions report

Program Code and Program Description have been made available on the Admissions report

Case: 36503 Retention tools for General Student page

Millennium is adding tools within the Student Application to assist with student retention. The first phase of this project has been implemented in this release. Functionality includes:

- 1) The ability to include students who are "eligible to register" (as opposed to only registered) in the General Student Info page and underlying warehouse tables. (Case 36442)
- 2) On the Student Info > General Info page, the following new functionality was added:
 - a) Ability to 'Request Help' for student, starting a Student Follow Up workflow (Case 36504).
 - b) Ability to track information relating to student transferring, taking a leave of absence, or stopping out entirely by clicking 'Student Leaving?' hyperlink (Case 36505).

Case: 36504 Student Follow Up page

New data entry page created to track and assign outstanding follow up tasks for students. Navigate directly to the Student Follow Up page from the 'Student Info' menu, or generate tasks from the Student 'General Info' page. When new tasks are assigned, notifications are automatically generated for those assigned a new follow up item.

Examples of how this might be used are as follows:

- 1) Allow people to capture address changes for students when they find out who don't actually have access to update addresses in your ERP system.
- 2) If student reports a question during an advising session, advisor could quickly document the question and assign it to the registrar, admissions, transcript reviewer, accounts receivable, etc.

Case: 36505 Drop out Students reporting

New data entry page 'Leaving Students' exists on the Student Info menu. This form can be accessed via the Student General Info page, or directly via the menu.

This page can be used to track students who communicated that they are dropping out, taking a leave of absence, or transferring. It allows the institution to track the reasons why the student is leaving via "Leave Tags". It also allows institution to track the school to which the student intends to transfer.

If student changes their mind and ends up staying, that can also be tracked along with the reasons why they decided to stay.

The information from this page can be used to assist in retention efforts.

Case: 36530 COLLEGE warehouse table and dynamic procedure (external institutions from STVSBGI)

New warehouse table containing external colleges (codes and names) now exists. Additionally, dynamic procedure created so that external college dropdown lists, search boxes, etc. can now be used in custom reports and data entry pages.

New warehouse table is SYNCOLLEGES_EXTERNAL.

Case: 36572 Degree Status Stage Table (STAGE_STVDEGS)

New degree status stage table exists (STAGE_STVDEGS).

Case: 36576 Add term ranking to Student Info warehouse table

Added the ability to easily identify the most current active term for each student. Added a filter "Most Recent Term only" to the General Student Information report.

Case: 36603 Modify "All Students" filter procedure

Modified 'All Students' filter procedure to allow for use in data entry pages.

Case: 36701 Add Wait Capacity indicator to the Student Warehouse

WAIT_CAPACITY has been added to both the SYNSCHEDULE and SYNSCHEDULE_SUMMARY warehouse objects.

Case: 36710 Add Credit Hours Attempted to the List of Students report

Added a new "CrHr Attempted" column to the List of Students report. This column is disabled by default but can be enabled by the user on the Advanced Options tab. If the List of Students report has been customized at your institution then the customization will need to be updated to add the new column.

Case: 36740 Student Follow Up Tag Maintenance Form

This page allows users with edit access to modify existing 'Follow Up tags' in bulk for entries made via the 'Student Follow Up' page.

This form allows users to replace Follow Up tags with an existing tag from dropdown list, or enter a new tag.

This would primarily be used if someone creates a new tag when they should have used an existing one or if maintainer simply doesn't like name of new tag created by data enterer. Users with edit access to this page will get notifications within FAST if a new tag gets created.

Case: 36741 Student Leave Tag Maintenance Form

This page allows users with edit access to modify existing 'Student Leave tags' in bulk for entries made via the 'Student Leaving' page.

This form allows users to replace Student Leave tags with an existing tag from dropdown list, or enter a new tag.

This would primarily be used if someone creates a new tag when they should have used an existing one or if maintainer simply doesn't like name of new tag created by data enterer. Users with edit access to this page will get notifications within FAST if a new tag gets created

Case: 36742 Student Stay Reason Tag Maintenance Form

This page allows users with edit access to modify existing 'Student Stay tags' in bulk for entries made via the 'Student Leaving' page.

This form allows users to replace Student Stay tags with an existing tag from dropdown list, or enter a new tag.

This would primarily be used if someone creates a new tag when they should have used an existing one or if maintainer simply doesn't like name of new tag created by data enterer. Users with edit access to this page will get notifications within FAST if a new tag gets created

Global Changes That Affect All Applications

Case: 36395 CSV export always forces columns output in default order

Fixed a bug where CSV exports would always output the columns in the default order instead of the order set by the user via the Advanced Options.

Case: 36399 New administration form for Database Links

Created a new form in each application under Queries -> Query Builder -> External Database Links to display all database links that are available to an application's QUERY schema and allow technical administrative users to create or modify these database links.

Case: 36460 Don't Display NULL Values on Line Graphs

Fixed a bug where NULL values in the y-axis field were showing as 0s on line graphs. The line will no longer appear for NULL values.

Case: 36500 "Data as of date" label for external modules

The Client Warehouse Builder will now update the As At data refresh label for custom external applications.

Case: 36703 Can't upload to Excel when export to Excel is disabled

Fixed a bug where a data entry page with Export to Excel turned off and Import from Excel turned on would not show the Excel button on the footer ribbon.
