
FASTFINAID

Case: 39089 Add SMS Number to FinAid Reports

Added the SMS Phone Number field to the data warehouse and all relevant reports.

Global Changes That Affect All Applications

Case: 34702 Allow manual creation of Notifications

Created a new "Manually Generate Notification" option under the Administration menu (or the Maintenance menu) within each application. On this screen you can pick a FAST security role, and enter a message, then click the save button. Every user who has the role specified will receive the notification message.

Case: 36733 Update hyperlinks control to add communication options

Added communication options (SMS and Email) to the Hyperlinks tab (under the Function child tab).

Case: 37526 Add Color Picker to Dashboard Colors page

Added a new color picker control to the Dashboard Color Palette screen.

Case: 37722 SMS Number Administration

The SMS Number Administration page allows administrators to purchase new Outgoing SMS (texting) numbers and, optionally, assign numbers to specific FAST applications.

Case: 37723 SMS Administration: 'Do Not Contact' Management

SMS contact restrictions by ID and pool can be viewed from this reporting page. If granted edit access, users can also add SMS texting restrictions by pool and date range for a specific ID. NOTE: The preferred method for editing SMS preferences is via a STOP/STOPALL text or via the institutional ERP.

Case: 37724 Contact Status Summary Report

Contact Status Summary Report shows available contact information for all 'STUDENT' and 'EMPLOYEE' records within FAST, including contact restrictions.

Case: 37725 SMS Administration: Ability to "Redact" messages

Users with administrative access to SMS Pools have the ability to redact messages that contain sensitive/inappropriate information.

Case: 37758 Check box fields display as data when subtotals are used

Fixed a bug with page level subtotaling (via Advanced Options tab) when the report had checkbox data entry columns they would display as 0s and 1s instead of checkboxes.

Case: 37786 Contact Status Type Admin Page

Contact Status Type Admin page allows you to modify the descriptions and help messages for Contact Status Types. For example, if a student has to visit the registrar's office to make a phone number change or mark their record 'Confidential', you might want to alter the appropriate contact status message(s) to include this information.

Case: 38857 Can't copy a row on a custom data entry page

Fixed a bug on generic custom data entry screens where copying a row then clicking save would generate an error.

Case: 38903 Validation table for times

Created a new validation table FASTPORTAL.tblTimes which contains 30 minute intervals between 12:00am and 11:30pm. This table can be used in custom queries/filters/reports/data entry pages if needed.

Case: 38989 SMS History Report

SMS History report created within site administration to view all SMS History, including redacted messages and message status.

Case: 39081 Make date dynamic filters available on User/Role Assignment Audit report

The option to query using dynamic date filters was added to the User/Role Assignment Audit Report.

Case: 39178 Save date control dynamic filter to profile

Fixed a bug with the date filter control when using a dynamic filter (ex. "Today" or "Yesterday" etc) where it wouldn't correctly save that dynamic value to the user profile as a default filter value (the little blue disk icon above the filter control, to the right of the filter name, on the filter options tab).

Case: 39192 Can't use #lowercase# or #MixedCase# substitution filters

Fixed a bug with custom reports based off queries that use substitution filters where #lowercase# or #MixedCase# substitution filters would not work. Only #UPPERCASE# substitutions were working.

Case: 39288 SMS (Texting) functionality

Added system wide functionality for FAST to send SMS messages to students and/or employees.
