
FASTFINANCE

Case: 42463 Issue with sort order when crosstabbing on Transaction Detail reports

Fixed an issue where the sort order would not be applied when crosstabbing any of the various Transaction Detail reports.

Case: 42474 Virtual Column header issue when using complicated formula

Fixed an issue with Virtual Columns if a complicated formula was used.

Case: 42659 Invoice Query Details - Gear and Graph buttons don't work

Fixed a bug on the Invoice Query (Details) screen where the gear and graph buttons below the filter trail and above the report results grid would not do anything when clicked.

Case: 42661 Problem looking up default chart

Fixed an issue for clients with more than one chart if one chart was disabled, under some circumstances the system would incorrectly identify the disabled chart as a user's default chart.

Case: 42824 Trial Balance error getting Default Columns

Fixed an issue with the storing/retrieving of the last selected set of columns used on Trial Balance report from a user's profile.

Case: 42910 Retired Finance Classic Reporting

Finance Classic has not been supported for many years now. It has now been officially removed from the FAST system.

Global Changes That Affect All Applications

Case: 41392 Edit a report that has Virtual Columns

Ensured that Virtual Columns do not appear on the report builder wizard and that changing a report through the wizard will not affect any users' existing Virtual Columns.

Case: 42602 Display errors that occur on the Dashboard

When an error is generated from an item on a dashboard, that error will now appear when the dashboard is finished rendering (instead of what happened before where the error would appear the next time any screen loads).

Case: 42690 Display issue when resizing window

Fixed a minor display issue when resizing a browser window if the Page Notes section was visible.

Case: 42709 Individual Email and Email All features only supports one Email column per report

Updated the Hyperlinks tab to only allow one Email control to be added to a report at a time.

Case: 42744 Dashboard error if pinned report has multiple Y axis defined

Fixed an error that would occur if a graph with multiple Y axis was added to a dashboard.
