

---

***FASTPCARD***

---

**Case: 41719 Link to FASTJV details from Accrual Batch History report**

Added a link on the Document number column of the Accrual Batch History report which shows the user a PDF output of the FASTJV details of that document.

---

## ***Global Changes That Affect All Applications***

---

**Case: 41392 Edit a report that has Virtual Columns**

Ensured that Virtual Columns do not appear on the report builder wizard and that changing a report through the wizard will not affect any users' existing Virtual Columns.

**Case: 42602 Display errors that occur on the Dashboard**

When an error is generated from an item on a dashboard, that error will now appear when the dashboard is finished rendering (instead of what happened before where the error would appear the next time any screen loads).

**Case: 42690 Display issue when resizing window**

Fixed a minor display issue when resizing a browser window if the Page Notes section was visible.

**Case: 42709 Individual Email and Email All features only supports one Email column per report**

Updated the Hyperlinks tab to only allow one Email control to be added to a report at a time.

**Case: 42744 Dashboard error if pinned report has multiple Y axis defined**

Fixed an error that would occur if a graph with multiple Y axis was added to a dashboard.
