
Global Changes That Affect All Applications

Case: 41392 Edit a report that has Virtual Columns

Ensured that Virtual Columns do not appear on the report builder wizard and that changing a report through the wizard will not affect any users' existing Virtual Columns.

Case: 42602 Display errors that occur on the Dashboard

When an error is generated from an item on a dashboard, that error will now appear when the dashboard is finished rendering (instead of what happened before where the error would appear the next time any screen loads).

Case: 42690 Display issue when resizing window

Fixed a minor display issue when resizing a browser window if the Page Notes section was visible.

Case: 42709 Individual Email and Email All features only supports one Email column per report

Updated the Hyperlinks tab to only allow one Email control to be added to a report at a time.

Case: 42744 Dashboard error if pinned report has multiple Y axis defined

Fixed an error that would occur if a graph with multiple Y axis was added to a dashboard.
