

FASTAR

Case: 43487 Add "Today" dynamic filter for As At Date control on ATB Customer report

To allow for the ATB Customer report to create useful Pinned Reports, a "Today" dynamic filter has been created for the As At Date control (press the FX button to use it).

Case: 43931 Add security to "Re-print Invoices for a Customer" and "Receipt(s) for Invoice No."

These reports can now be rolled out to de-centralized External User and/or External Super User groups if desired.

Global Changes That Affect All Applications

Case: 43405 Excel Import does not work on Dynamic Procedures screen

Users can now export from and import to the Dynamic Procedures screen (i.e. to move them from TEST to PROD).

Case: 43783 Client Warehouse issue - long select statements

If the select statement used to build a client warehouse table exceeded Oracle's listagg maximum length, the creation of a new client table would error out. This case changes how the insert statement is being built to accommodate long select statements.
