
Global Changes That Affect All Applications

Case: 43405 Excel Import does not work on Dynamic Procedures screen

Users can now export from and import to the Dynamic Procedures screen (i.e. to move them from TEST to PROD).

Case: 43783 Client Warehouse issue - long select statements

If the select statement used to build a client warehouse table exceeded Oracle's listagg maximum length, the creation of a new client table would error out. This case changes how the insert statement is being built to accommodate long select statements.
