FASTHR

Case: 44481   Create SNAP in FAST HR

Add new feature to be able to create Archive Tables. Archive tables are useful when the data is hard to pinpoint based on a specific date. There are two baseline archive tables and reports based on Employee Summary and Current Job records.

To enable these, goto the Administration menu, Archive Schedules, Archive Table Schedule Setup. Here you can select the frequency of the archives to take.

The frequency can be daily on selected days, weekly, monthly on specific days or annually on specific days.

Case: 44512   Leave Calendar data type issues

Update Calendar to pull data from same place as Leave Time Details report. (hourly recorded table).

Case: 44571   Add index for jobs

Create new reporting index for performance on All Jobs

Case: 44666   Add job history comments

Added fields related to Job Comments including Job Comments, Date of Comment and UserID of who created this comment.

These are added to:
All Jobs
Current Jobs
Primary Jobs
All Job History

Case: 44716   Add Personnel Date to Controls for Jobs

Add new filter control for Personnel Date to each of the jobs reports

Case: 44790   Update refresh for Earn distribution

Update the warehouse source for Earning Distribution

Case: 44839   Add Fair Labor Standards Act indicator to Jobs Reports

Add FLSA code (Fair Labor Standards Act indicator) from CLASS CODE to all 3 jobs reports

Global Changes That Affect All Applications

Case: 43716   Enable Excel import on Client Warehouse Builder - Table Definitions screen

You can now import from Excel on the Client Warehouse Builder - Table Definitions screen. This helps streamline the bulk migration of objects between environments (ex. moving multiple tables from TEST to PROD all at once).

Case: 44584   Ability to share Communication Templates

Communication Templates can now be shared with groups. In order to share a template, a user must have the "Create/Update Shared Comm. Templates" role, or have admin level access to the application via the Master Role or Site Administrator role.

Sharing a Template follows the same pattern and structure as sharing a Pinned Report or sharing a Dashboard. One or more roles can be specified to be able to use the Template and one or more roles can be specified to be able to edit the template. If "edit" roles are not specified then only the creator of the template can update it.

Case: 44586   Differentiate Communication Templates between Email and SMS

When saving a Communication Template we now track whether it was entered as an Email template or a SMS template.

Case: 44784   Error putting crosstab report on dashboard

Fixed a bug with displaying a cross-tabbed Pinned Report on a Dashboard.

Case: 44874   Add fields to tblEmailLog

Added new fields to FASTPORTAL.tblEmailLog to aid in tracking outgoing messages and email campaigns etc.

txtRecipientInternalID: the ID associated with the email address where this message was sent

fctrStatus: we now log failed messages as well as successful (status=1 means success, status=2 or 3 means failed)

numBatchID: whether the message was part of a mass mail out or directly to an individual (indicated by NULL)

Client specific cases may or may not appear in this list, depending on their impact on the baseline applications and / or site specific settings.
