
FASTFINANCE

Case: 46687 FSE Copy and Export are not including Multiplier column

Fixed a bug when the multiplier column is enabled on the Financial Statement Editor: it was not getting copied over when the statement was copied, exported or imported.

Global Changes That Affect All Applications

Case: 46455 Pinned Reports Admin Report issue

An error causing '# with View/Edit Access' column to display incorrectly has been resolved.

Case: 46562 Add visual indicator to Document Chat button to indicate if a chat dialogue exists

Added a visual indicator to indicate whether a chat exists/existed for that document. Currently this is used with WebReq (Requisition) and Student (Grade Approval) .

Case: 46563 Set XLSX output row height

Created a global system wide configuration setting #5105 "Default XLSX export row height" under Site Administration to control the row height setting when exporting reports to Excel.

Case: 46570 Default negative values in filters

Fixed a bug when a Numeric Comparebox filter was set to be mandatory but did not have a range set: the default value of the filter would show as -999999999999.99. It will now show a default value of 0.
