## ***Global Changes That Affect All Applications***

---

**Case: 46455 Pinned Reports Admin Report issue**

An error causing '# with View/Edit Access' column to display incorrectly has been resolved.

**Case: 46562 Add visual indicator to Document Chat button to indicate if a chat dialogue exists**

Added a visual indicator to indicate whether a chat exists/existed for that document. Currently this is used with WebReq (Requisition) and Student (Grade Approval) .

**Case: 46563 Set XLSX output row height**

Created a global system wide configuration setting #5105 "Default XLSX export row height" under Site Administration to control the row height setting when exporting reports to Excel.

**Case: 46570 Default negative values in filters**

Fixed a bug when a Numeric Comparebox filter was set to be mandatory but did not have a range set: the default value of the filter would show as -999999999999.99. It will now show a default value of 0.
