
Global Changes That Affect All Applications

Case: 45002 Client Support integration into FAST

In Site Administration, under the Help menu, we added a new report called Support Cases. This pulls data from the Millennium Customer Support system to show you the status of your submissions to customersupport@mcs.com.

Users with access to this report in Site Administration will also see a button in the top right corner next to the user profile name and the chat icon which will bring this information up in a popup dialog.

Case: 46819 Default graph setup controls to "collapsed" when drilling down

When a Pinned Report contains a graph and a user drills down on that graph from a Dashboard, the configuration/setup panel for the graph will no longer show up by default, which leaves more space on the screen for the graph and draws focus to the data rather than the configuration.

Case: 47126 CSV export fails when "value, value" present

Fixed a bug with CSV exporting when a cell contains two values separated by a comma and wrapped in quotes, for example "value, value"

Case: 47235 Show column filter dialog for CLOB columns

We now allow filtering via column level filters on CLOB datatypes using LIKE, NOT LIKE, NULL and NOT NULL comparison options.

Case: 47258 Remove All Sorting

In the column level context menu of a reporting grid, the "Remove Sorting" option has been changed to two options:

1. "Remove sorting on this column"
2. "Remove ALL Sorting"

Case: 47352 Increase size of comment field for custom queries

The "Query Comments" field on the Query Builder screen has been increased to accept up to a maximum of 4,000 characters in length.

Case: 47370 Performance of maintenance tasks

Improved the performance and frequency of background maintenance tasks.

Case: 47417 Clear Adv. Options after using Subtotaling

Fixed a bug on the Advanced Options tab: after subtotaling, when clicking the Clear Advanced Options button, the subtotal fields would be cleared however the checkboxes in the Grid Options section for those fields would not be re-enabled.
