FASTHR

Case: 48760   Add Contract Type filter to 2 Jobs reports

Added Contract Type filter to the All Jobs and Primary Jobs reports.

Case: 48827   Update fnFiscalYear to pull from PTRCALN instead of vwfsperiod

Update logic to pull Fiscal Year from HR calendar rather than derive from Finance calendar.

Case: 48860   Add Leave Reason type to Employee Benefit

Add Leave Reason Type and Description to Employee Benefit Deduction information.

Case: 48979   Job Comments - add ability to show multiple comments based on one date

Update job comments logic to display multiple job comments when there are more than one for a given effective date.

Global Changes That Affect All Applications

Case: 47233   Unique Records checkbox becomes disabled

Fixed a bug on the Advanced Options tab where the "Display only unique records" checkbox would not become re-enabled after removing/no longer using Group Functions.

Case: 48516   Add Tooltip on Search Box Multi Filter Compare Options

Added a tooltip to the SearchBox Multi filter with some helpful usage tips:

- Click the magnifying glass icon to search.
- If you know a specific value, you can type it in without searching.
- Entering a comma separated list of values will split automatically into individual values.
- Enter a : to set a range, for example A:Z.
- Enter a % for a wildcard, for example A% (starts with) or %Z (ends with) or %A% (contains).

Case: 48797   Query comments

Fixed a bug when saving a query in the Query Builder and specifying comments: if more than 100 characters of comments were entered an error would appear stating that the max length is 4000 characters. You can now properly add comments longer than 100 characters up to a maximum of 4000 characters.
