
FASTFINANCE

Case: 50071 Add FOAP element predecessor and predecessor title to Summary by Hierarchy reports

Added FOAP element predecessor and predecessor title to the Summary by Hierarchy - Current Year report. These columns are hidden by default until enabled. They are only visible when summarizing by a FOAP element otherwise they will be automatically hidden, even if they are manually selected.

Case: 50430 Improve data refresh performance

Performance improvements were made in the data refresh to the build process for Financial Statement Editor.

FASTHR

Case: 50292 New Report: Employee Phone Numbers

Created a new report named Employee Phone Numbers. This will display all the different Tele Code types of numbers for each employee. To get a report with the Tele Codes across the top in columns you can crosstab the report using the Advanced Options tab.

FASTPCARD

Case: 50012 Configuration Setting to prevent submission for approval if no attachments are present

Created a new configuration setting #797: "Require attachments when submitting for approval? (Y/N)" (default value = N).

When this is set to Y users will not be able to submit for approval unless there is at least one attachment.

Case: 50278 Cardholder electronic declaration

Created two new optional messages for the Approval screen. These are blank by default, but if specified for your organization they will prompt the user with a popup "confirm" dialog when submitting for approval. These messages can be found under Administration -> Layout -> Application Text by searching for Page Name = Approval.

pgtxtLevel1ConfirmMessage will display when submitting from a user to an approver.

pgtxtLevel2ConfirmMessage will display when submitting for final/central approval.

If a message is blank nothing will happen. If a message is defined, for example: "I certify that these expenses are for University use." then the user will be forced to click "Ok" or "Cancel" when the message pops up.

FASTSTUDENT

Case: 49984 Add new gender and pronoun fields to existing reports

Non-binary gender fields have been added to the following reports:

- Admission Detail Info
- Admissions
- Admissions Archive
- Degree Applications
- Prospect Contact
- Personal Info
- Recruit Info
- Registration Detail Info
- Registration Count Summary
- Registration Count Detail
- Registration List of Students
- Registration Archive Report
- Student Medical Info

Case: 50101 Institutional Definition Errors

In certain circumstances when wildcards are used or when multiple 'AND' lines are included, errors occur with institutional definitions. These issues have been resolved.

Case: 50120 Add Enroll Status to the All Registrations Report

The Enrollment Status code has been added to the All Registration Records report. This is pulling from the warehouse object FASTSTU.SYNSTUDENT_INFO and is populated with the value from SFBETRM_ESTS_CODE, unless this value is blank. If it is blank that the warehouse will be populated with the value stored in Configuration Setting 435.

Case: 50178 Add approver Assigned To column to the Courses Not Approved report

The approver that a course has been assigned to, to approve the grades, has been added to this report.

Case: 50184 Add Student Program and Minor options for Institutional Definitions

Added the option to use student programs and/or minors in institutional definitions. Also updated how major, department, degree, and concentration institutional definitions work to search all values if they have more than one for the term.

Case: 50203 Student Info Warehouse table issue

Join to pull current academic standing in query populating the SYNSTUDENT_INFO warehouse table changed to a left join.

Case: 50233 Building Room Listing

Fixed bug in warehouse table query.

Case: 50240 Course Summary report: New Columns & Live Option

The following columns have been added to the Course Summary and Enrollment Summary reports:

- Census Date
- Census Date 2
- Lab Hrs
- Lecture Hrs
- Other Hrs
- Prereq Check Mthd
- Sched Print Ind
- Sched Code
- Gradable Ind
- Weekly Hrs
- Billable Hrs

You can adjust whether new columns and/or filters are enabled via the Administration tab of the report(s).

The option to run the Course Summary report against live Banner data has also been added and is available for users with the 'Student - Live Reporting' role.

Case: 50277 Student Major, Minor, Concentration, Department filter issue

When using major, minor, and concentration filters from reporting pages, some incorrectly pulled majors for one term past the end effective term. This issue has been resolved.

Case: 50283 Add additional columns to Prior College information report

We have added Prior College GPA and Transfer Credits as optional columns to the Prior College report.

Case: 50342 Add Live Option to Recruit report & Update Admissions to honor live mode on certain filters

Recruit Info report: The option to run against live ERP data is available for users with the 'Student - Live Reporting' role.

Admissions Info report: Updated so that when being executed in Live mode, filters also pull from live data.

Case: 50362 Transfer Course Detail Report - Live Reporting Option

The option to run this report against live ERP data is now available for users with the 'Student - Live Reporting' role.

Case: 50403 Add fields to SYNDEGREE_MAJOR_LIST

Multiple columns added to SYNDEGREE_MAJOR_LIST warehouse table and are now available to be added to the Degrees Granted report via Administration tab.

Global Changes That Affect All Applications

Case: 49925 Report Results tab

Added logic to prevent the Report Results tab from being disabled via the Edit My Tabs dialog.

Case: 50281 Upgrade To Active Reports 15

Updated the library that we use for generating PDF reports and PDF exports to the latest version.

Case: 50319 Allow application admins to edit homepage links and news

Previously, the only people that could add/edit records to the homepage links and news controls were people with the Site Admin role or with the LINKSADMIN role. Individual application master role users will now have this ability as well.

Case: 50434 Can't use Dynamic Functions on date controls through page builder

Added the ability to select Dynamic Functions in the custom report builder wizard when the Filter Type is Date Combo Box.

Case: 50437 Help files not loading on custom pages

Fixed a bug where the help files would not load in an iframe on the Help tab of a custom report.
